

# QP34

**Steklov Mathematical Institute of Russian Academy of Sciences  
Association for Quantum Probability and Infinite Dimensional Analysis**

## **34<sup>th</sup> INTERNATIONAL CONFERENCE ON QUANTUM PROBABILITY AND RELATED TOPICS**

*September 16 – 20, 2013*

*Steklov Mathematical Institute, Moscow,  
Russia*

<http://qp34.mi.ras.ru>

The conference continues a traditional series of yearly conferences on quantum probability and related topics. Conference topics include recent developments in quantum probability and quantum dynamics such as quantum Markov processes and semigroups, white noise calculus, quantum stochastic calculus, stochastic limit and applications to physics, quantum information theory, quantum control, Levy Laplacians and associated processes, free probability, independences, Hilbert modules, non-commutative geometry, interacting Fock spaces, infinite dimensional Lie algebras, infinite dimensional analysis, quantum field theory, quantum optics, and other related subjects.

Organizers: Luigi Accardi, Sergei Kozyrev, Alexander Pechen, Igor Volovich
